The main aspects of our program are:

A) The motivational therapy is provided by **Dimitrios Hatzivlassiou MD, PhD** who is trained in weight management and is board certified in psychiatry. Most of the eating habits are connected and influenced from our psychological structure. Have you noticed that it is easier to lose few pounds but more difficult to maintain a proper weight? Dr. Hatzivlassiou will help you to make permanent life style changes by identifying the reasons behind your overeating habits.

B) To help curb the appetite, prescription appetite suppressants like phentermine, phendimetrazine etc. will be dispensed by the physician on site, to proper candidates.

C) To boost your metabolism a mixture of amino acids like methionine, inositol and choline plus vitamin B12 will be provided in biweekly injections.

D) We are proud to offer the Take Shape for Life, featuring MEDIFAST meals. The Medifast program and products are safe and effective. For over 25 years, Medifast has helped more than 1 million people lose weight and has been recommended by more than 15,000 physicians including our Medical Director.

The main advantages of the meal replacements are the improved compliance, the convenience and the proper balance of nutrients that makes weight loss safe and effective. All in a cost of **less than \$10 a day!** (Imagine what you pay for grocery and dining out in a day). For those who prefer not to use the Medifast meals proper nutritional instructions will be provided.

Price list:
